

## COVID 19 Phase 2 Reopening Plan

Effective May 13, 2022, the Cedarburg Veterinary Clinic, s.c. has decided based on the current COVID incidence rates to move to its Phase 2 plan for reopening. We ask for precautionary reasons that any customers planning on entering the building who are feeling ill or having cold or flu symptoms reschedule your appointment. Masks will be recommended but not required. Entrance to the building will continue through our breezeway stopping at the scale as you enter the building to check in with the receptionist and to weigh your dog. Customers can wait in the lobby until called for your appointment. Curbside appointments are still available for those customers who request them for health reasons. If you requested a prescription, you can now enter the building to pay and pick-up the medication. The CVC team appreciate your patience and compliance with our plan. Our ultimate goal is to continue to keep our staff and clients safe so that we can remain open to care for all our patients.
